Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2, 4-7, 11-13, 16, 20-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over of Nissl et al in view Pinizzotto.

Nissl et al discloses a method of limiting the amount of time information is valid in support of an electronic transmission. A date/time stamp representing the current time is encrypted and transmitted along with encrypted digital data. A validating entity decrypts the encrypted stamp to determine the age of the digital data as represented by the time of the decrypted stamp is within a predetermined time limit for validation of transmission (col 7, lines 60-67; col 8, lines 1-20).

Nissl et al does not disclose a credit card transaction, or where the digital data is credit card data including PIN or PKN.

Pinizzotto discloses credit card transaction encryption, where the digital data is credit card data including PIN or PKN (para 0014, 0020-0023).

It would have been obvious to one with ordinary skill in the art to include discloses credit card transaction encryption, where the digital data is credit card data including PIN or PKN to the method of Nissl et al because Pinizzotto teaches the importance of security for credit card transaction information (para 0001) and Nissil et al teaches the importance of financial transaction security (col 1, lines 44-47).

Response to Arguments

3. Applicant's arguments have been fully considered but they are not persuasive. Since information is transmitted to all parties, there appears to be taught the specific information transmitted as claimed.
